PROJECTS

Voice Cloning Web Application

- Built a full-stack web application using Python (backend) and HTML, CSS, JavaScript (frontend) to clone and generate human-like voices.
- Designed a simple and interactive user interface for audio upload, voice processing, and playback.
- Integrated AI-based voice synthesis APIs to process audio data and deliver real-time voice generation.
- Improved user experience by ensuring smooth performance and fast response times.

Bean & Bloom Coffee — Website

- Developed a responsive coffee shop website using HTML, Tailwind CSS, React, and JavaScript.
- Designed interactive menu sections and added simple animations for better user experience.
- Ensured the website works smoothly on mobile, tablet, and desktop devices.

Text2Music — Clone Website

- Built a clone of the Text2Music website using React and CSS to practice frontend development.
- Created reusable components and managed dynamic content using React state.
- Designed a responsive layout that adapts to different screen sizes.

Furniture E-Commerce Website

- Developed a responsive e-commerce website for furniture using React.
- Integrated APIs for product listing, user login, and checkout functionality.
- Focused on creating a clean and user-friendly interface.

Prime Construction — Web Portal

- Built a responsive web portal using React and CSS.
- Added smooth animations to improve the overall look and feel of the website.
- Ensured the website works well across different devices.
